# Team Activities

Utilising the natural environment these activities are perfect for building trust, communication and forming strong bonds within the team whilst having lots of fun.

# The Scrabble Scramble

**The Scrabble Scramble is the perfect activity for groups with a wide range of talents and physical ability. All it requires is to be able to walk, be a tad competitive and of course have lots of fun!**

## Overview

Participants are split into teams and will be dropped off in allotted areas in and around Kingscliff. From there they will be given a dossier and it's up to them in the specified timeframe to unscramble the scrabble. When teams cross each other's path they can choose to help or hinder their competitors.

On arrival at the drop off point the dossier will include:

- Instructions on how to play
- Map of the area
- Challenges they must partake in
- Landmarks where scrabble letters await and a very vague clue
- Photos they must replicate
- Materials they must collect to compete in the finale

Along the course teams will meet up with trained facilitators that will have various challenges for teams to complete both intellectual and physical. Once complete they will be given points and tools they can use for their final team challenge. Their maps will contain a legend that will specify hidden letters that if found will decipher what lies ahead and will earn extra points.

The clock will be ticking the whole way through as teams try to complete as much as possible to earn points that will give them glory.

The Scrabble Scramble is a fun, easy and exciting way to see the natural iconic sites of Kingscliff whilst joining in on a team activity. If there is one event to suit everyone then this is it.
